

You are invited to a wood heating event

Date: Thursday Feb 8th 2007

Location: Sustainability Centre,
East Meon, Hampshire

Map: http://www.earthworks-trust.com/html/find_us.html

Time: 14:00 to 16:00

Duration: 2 hours, coffee
provided

Attendees: Owners &
managers of hotels, conference
centres & other tourist facilities

Cost: No cost

Interested?

Please note numbers are limited
so contact:

Linda Glynn

With rising gas and oil prices wood is now the cheapest heating fuel in the UK.

- Does your organisation have buildings with large heat loads?
- Are you concerned about the rising cost of traditional heating fuels such as oil?
- Would you like to know more about the advantages offered by modern wood heating systems to your local community?

If you answer yes to any of these questions then come to the wood heating event and talk to the experts about wood as a fuel.

The event is free and will cover:

- Details of BioMAP
- An overview of modern biomass heating systems
- Economics of using wood heating, from capital costs and available grants to running costs compared with conventional heating fuels
- Environmental advantages of using wood as a fuel
- A site visit to the biomass heating system and chipping operation

About BioMAP

Semi-natural ancient woodland covers almost 20% of the South Downs and yet the woodland economy has virtually collapsed leaving most of these woodlands in a very neglected state. Using wood for heating is not only sustainable in that it is CO₂ neutral but it also provides a potential economic incentive to manage woodlands and thus provide sustainable land management for this important habitat.

BioMAP is a project which is funded by the South Downs Sustainable Development Fund, West Sussex County Council and Renewable Heat & Power Ltd (RHPL). It is being undertaken by Natural Light Partnership (NLP) in association with its partners, wood4heat and South East Wood Fuels (SEWF).

BioMAP offers real help to potential wood heating projects in West Sussex and across the South Downs including parts of Hampshire and the urban settlements on its borders.

BioMAP offers:

- **information on modern wood heating and its advantages**
- **free technical advice on your prospective project to help you clarify your requirements**
- **1 to 1 on site advice**
- **visits to and seminars about real world wood heating systems**

Hampshire
County Council

Hampshire County Council has provided financial support for this event

Project Sponsors:

NLP Partners include Hampshire County Council, West Sussex County Council, East Hampshire District Council, Chichester District Council, South Downs Joint Committee & Forestry Commission, BioMAP is focused on the promotion of economically viable, sustainable energy solutions.
